PROFILE

Highly motivated and ambitious web developer with a passion for creating user-friendly and efficient websites. Skilled in using **JavaScript, Node.js, React, HTML, CSS, MongoDB, and Python**. I have completed several projects that showcase my skills and experience in web development, currently pursuing a Bachelor's degree in Information technology, and am expected to graduate in 2025.

SKILLS

- JavaScript
- Node.js
- React
- Express.js
- Python
- CSS
- jQuery
- MongoDB
- Git

PROJECTS

FACE RECOGNITION ATTENDANCE SYSTEM

Python

- Implemented an automated attendance tracking system using facial recognition.

Features:

1. use student face to attend
2. store record in a txt file
3. the teacher can check to make a whole record or check one student's record

LCOIN TOKEN

Developed a digital token using blockchain technology and **Mokoto**, with a user interface built using **React.js**.

Implemented smart contracts, integrated **Dfinity** for interaction with the blockchain, and also added new features

ROLLING BALL

Javascript

A rolling ball created with Three.js offers an interactive and visually engaging user experience. The ball is created using Three.js, it moves along a track, the color can be changed, and user interaction is possible. These features are all achieved through the use of various classes and libraries within **Three.js**
